  - Equal to one or more Year Anniversaries
- Year (single or CS list)
  - Enter a single year, or multiple years with a comma ',' between the years
    - When 'Greater than' selection type, a single entry will provide all the anniversaries greater than or equal to the number entered. If multiple years are entered, selections will be based on the lowest value.
    - When 'Equal to' selection type, a single entry will provide all the anniversaries equal to that year. If multiple years are entered, only those anniversaries equal to those years will be displayed. (this is used to find 'milestone' anniversaries – 5, 10, 25, etc.)
- List Type
  - Couples - List one row per married couple or

- Members – List one row per member

- Expanded Details?
  - When ‘Show’ selected, Family registration data displayed in the first column, and when the ‘Members’ List Type is selected, Sacrament data, Gender and Maiden Name is displayed in the far-right columns.

Purpose: This report can be used to find anniversaries represented by the marriage information entered in the member sacramental records. You can choose to retrieve all married couples either by milestone dates like 25 and 50, or all over a certain number of years, like 25. You can also generate a list of all married couples for a single month or week for a list of anniversaries each month or week. (married couples that have a deceased status are not included)
